

## **Investing in North Carolina's Future**

Supports investing \$4.5 billion in North Carolina, including up to \$3.9 billion in General Obligation Bonds for construction and renovation of public schools, North Carolina Community College campuses, University of North Carolina campuses, Natural and Cultural Resources attractions, and local communities' water and sewer infrastructure.

# Savings from Closing the Medicaid Coverage Gap

Reflects reduced state appropriations required to maintain the current level of service in the Division of Mental Health, the Division of Health Benefits, the Department of Public Safety, and the State Health Plan due to closing the coverage gap by expanding Medicaid.

#### **Supporting State Employees**

To attract and retain a strong state workforce, the budget includes \$20 million for the Salary Adjustment Fund. These funds will help implement the new market-based classification and compensation system by raising salaries for positions that are hard to staff, have high turnover rates, and/or are paid below market rates. It will also help address gender equity disparities in pay and other salary adjustments identified through analysis using human resources best practices.

# **Improving State Agency Public Safety**

Enhances the security and safety of state facilities by providing \$7.5 million for communication system upgrades, equipment purchases, audio-visual security monitoring systems, panic alarms, improved doors, and other security features to prevent and respond to threats.

## **Using Data to Drive Decision Making**

Builds capacity across state government to more effectively manage state resources and programs by hiring analysts with advanced quantitative and research skills. These skills are needed to inform evidence-based, data-driven decision making for agency budgets and programs.

## **2020 Census Preparation to Make NC Count**

Provides \$1.5 million to get North Carolinians ready for the 2020 Census. The Census determines federal funding and programs across North Carolina and the next census will also determine if North Carolina gets an additional representative in Congress. Robust census data is also vital for planning, delivery of services, and economic development for every North Carolina county, municipality, and community.
