Quarterly Implementation Status Report
State Emergency Response and Disaster Relief Funds (SERDRF)
Allocated pursuant to Section 5.6(a) of Session Law 2023-134 for
Various Disaster Relief, Recovery, Mitigation and Resiliency Purposes

Reporting Period: January 1, 2025 – June 30, 2025
Prepared by the North Carolina Office of State Budget and Management
Disaster Recovery Section

Department of Agriculture and Consumer Services

Timber Restoration & NCFS Wildfire Response

SL 2023-134 Section 5.6 (a)(1)(a) - SL 2016-124 Section 4.1(10)(a)

The purpose of this program is to recapture unused funds for timber restoration under SL 2016-124 Section 4.1(10)(a).

Responsible Department and Agency

Department of Agriculture and Consumer Services

Funding Allocation Update

Appropriated	\$388,341.00
Expended	\$00.00
Obligated	\$00.00
Unobligated Balance	\$388,341.00*

Summary of Activities

Timber Restoration (October – December 2020)

Projects complete.

*June 2024 Recapture of Disaster Funds per SL 2023-134, \$288,072 from Timber Restoration to the OSC General Fund.

NCFS Wildfire Response (October – December 2020)

Projects complete.

*June 2024 Recapture of Disaster Funds per SL 2023-134, \$100,269 from NCFS Wildfire Response to the OSC General Fund.

Non-Field Farm Road Repairs

SL 2023-134 Section 5.6 (a)(1)(a) - SL 2016-124 Section 4.1(10)(b)

The purpose of this program is to recapture unused funds for non-field farm road repairs under SL 2016-124 Section 4.1(10)(b).

Responsible Department and Agency

Department of Agriculture and Consumer Services

Funding Allocation Update

Appropriated	\$178.00
Expended	\$00.00
Obligated	\$00.00
Unobligated Balance	\$178.00*

Summary of Activities

Non-Field Farm Road Repairs (October – December 2022)

All contracts have now either been completed or cancelled. No additional work for non-field farm road repairs due to Hurricane Matthew is anticipated. Program Closed.

*June 2024 Recapture of Disaster Funds per SL 2023-134, \$178 from Non-field farm road repairs to the OSC General Fund.

Coastal Beach and Dredging Needs Assessment

SL 2023-134 Section 5.6 (a)(6)(b) – SL 2018-136 Section 6.1 – Committee Report Item 19

The purpose of this program is to recapture unused funds from funds allocated to conduct a survey of beaches and channels for hurricane related damage and to assess disposal areas for dredged material.

Responsible Department and Agency

Department of Environmental Quality

Funding Allocation Update

Appropriated	\$60,682.00
Expended	\$00.00
Obligated	\$00.00
Unobligated Balance	\$60,682.00

Summary of Activities

DWR has partnered with USACE through the Planning Assistance to States (PAS) program in which USACE provided a 50% match of \$133,000 to complete the Dredge Material Management Plan (DMMP). A scope of work for the DMMP was approved by the USACE Planning and Environmental Branch. The agreement between the state and USACE has been finalized and a payment has been provided to the USACE. The USACE has begun development of the database, contacting stakeholders along the ICWW to obtain dredging needs, and contacting potential spoil site property owners. The State and USACE have begun discussions to develop the scope of work for Phase 2 of the DMMP to determine dredging needs over the next 20 years. Although pictures cannot be provided of a final product some preliminary images of the location of the marinas and numbers of marina contacted by the USACE staff are attached. The Phase 1 information.

The cost share agreement for Phase 2 has been signed and the State matching funds (\$56,000) have been distributed to the USACE. The USACE has been contacting property owners from additional potential upland dredge disposal sites. The draft report has been started by obtaining additional information regarding permitting additional sites. This report will include environmental concerns, permitting options, as well as potential beneficial use of dredge material options.

Commercial Fishing Assistance

SL 2023-134 Section 5.6 (a)(6)(c) – SL 2018-138 Section 1.3(5)

The purpose of this program is to recapture unused funds from funds allocated for commercial fishing assistance. The Commercial Fishing Assistance program was designed to help make up for the losses to the state's nearly billion-dollar commercial fishing industry due to the storm. Compensation based on income losses from September, October and November harvest reductions due to Hurricane Florence as documented by state harvest records.

Responsible Department and Agency

Department of Environmental Quality

Funding Allocation Update

Appropriated	\$59,389.00
Expended	\$00.00
Obligated	\$00.00
Unobligated Balance	\$59,389.00

Summary of Activities

- a. 1,782 award letters were mailed to eligible Commercial Fisherman for September landings
- b. 728 checks disbursed for September losses totaling \$3,568,446.09.
- c. 1,829 letters were mailed to eligible Commercial Fisherman for October and November landings
- d. 1,041 checks disbursed for October and November losses totaling \$7,456,025.99.
- e. An additional final check write was sent out on 6/12/19 to 1,176 fishermen who participated in the program totaling \$450,000.

Performance Metrics

- a. Average Time for Project Delivery by Program
 - o Average number of days from application to fund distribution – There was no application process for these funds. Legislation was enacted on 10/16/18 (\$1.6 million) & 12/3/18 (\$10 million). The first phase of fund distribution was for September losses and occurred over multiple check writes between 1/31/19 and 5/13/19. The second phase of fund distribution was for October and November losses and occurred over multiple check writes between 4/3/19 and 5/13/19. The third phase and final phase of fund distribution covered the months of September, October and November and was sent out to exhaust the existing funds from the assistance program on 6/12/19.
 - o Average number of days from fund distribution to project commencement – The legislation was enacted on 10/16/18 and 12/3/18 and the first funds were distributed

- on 1/31/19, approximately 60 days.
- o Average number of days from project commencement to project completion – The legislation was enacted on 10/16/18 and 12/3/18 and final checks were distributed on 6/12/19, approximately 180 days.
- b. Amount and % spent/obligated on administrative activities by Program. \$66,139.34 was expended on administrative activities/0.57%
- c. Amount and % spent/obligated on behalf of recipients by Program. \$11,474,472.08 distributed to Commercial Fishermen/98.9%

Recent Activities for Current Reporting Period

This program resulted in a total of 2,945 individual checks to 1,176 fishermen totaling \$11,474,472.08. This program was able to cover 85.4% of September losses, 91.76% of October losses, and 82.29% of November losses. (January – March 2020) The program was completed.

Streamflow Rehabilitation Assistance

SL 2023-134 Section 5.6 (f)(3)

The purpose of this fund is to be used for the Streamflow Rehabilitation Assistance Program (StRAP) for purposes consistent with Article 6 of Chapter 139 of the General Statutes. StRAP funds projects that focus on protecting and restoring the integrity of drainage infrastructure through routine maintenance to existing streams and drainage ways by removing blockages caused by accumulated debris or sediment, stabilization and restoration of streams and streambanks, and for rehabilitation or improvement of small watershed structural projects constructed pursuant to the Watershed Protection and Flood Prevention Act of 1954, as amended.

Responsible Department and Agency

Department of Agriculture and Consumer Services

Funding Allocation Update

Appropriated	\$20,000,000.00
Expended	\$00.00
Obligated	\$19,000,000.00
Unobligated Balance	\$20,000,000.00

Summary of Activities

From November 2023 to February 2024, the Division of Soil & Water Conservation accepted applications for projects to be funded under the FY2024 round of StRAP funding. A total of 118 organizations applied for funds, requesting a total of \$222,081,502 for eligible projects. Organizations applying for funding included soil & water conservation districts, municipal governments, county governments, drainage districts, and nonprofit organizations.

In June 2024, the Soil & Water Conservation Commission approved the Division's planned awards. A total of \$19,000,000 was awarded to 98 organizations in 64 counties. Funds were awarded to all eligible project types, and the amount awarded to each project type include: \$9,927,335 for stream debris removal, \$192,500 for sediment removal, \$2,864,243 for streambank stabilization, \$2,970,707 for stream restoration, \$413,000 for culvert replacement and other miscellaneous projects, and \$2,632,215 for repair of small watershed flood control structures. The Division of Soil & Water conservation retains \$1,000,000 for program administration and operating costs.

Currently, the Division of Soil and Water Conservation is collaborating with the NC Department of Environmental Quality (DEQ) to use DEQ funds to support additional StRAP projects in the future.

Grantees awarded funds in 2024 will have until December 31, 2026 to complete their projects.

Resilient Coastal Communities Program

SL 2023-134 Section 5.6 (f)(5)

The purpose of this fund is to be used for the Resilient Coastal Communities Program to provide funding for the implementation or construction of planned, prioritized, and engineered resilience projects in the 20 coastal counties of the State. These counties are listed in G.S. 113A-103(2).

Responsible Department and Agency

Department of Environmental Quality

Funding Allocation Update

Appropriated	\$10,000,000.00
Expended	\$00.00
Obligated	\$00.00
Unobligated Balance	\$10,000,000.00

Summary of Activities

DCM staff released two Request for Applications (RFAs) for Phase 3 (Engineering & Design) and Phase 4 (Implementation) of the Resilient Coastal Communities Program (RCCP) on April 5th, 2024. The application period closed on May 31st, 2024. We received 27 applications for a total grant request amount of \$7.4M. We awarded 20 grants to communities for Phases 3 and 4 of the RCCP of a total award amount of \$6.21M.

One county and fourteen municipalities will receive engineering and design funds for the completion of Phase 3 of the RCCP:

1. **Ahoskie:** Stormwater Action Plan-Upgrade the Stormwater System - \$500,000
2. **Aulander:** Permeable Pavement and Green Stormwater Infrastructure Implementation Projects - \$173,250
3. **Beaufort:** Development Ordinance Resilience Updates - \$100,000
4. **Belhaven:** Stormwater Action Plan and Easement Acquisition Plan - Upgrade the Stormwater System - \$500,000
5. **Burgaw:** Rain Garden Installation and Educational Demonstration - \$55,000
6. **Creswell:** Reduce Flooding Impacts in the 1st-4th Street Area - \$500,000
7. **Dare County:** Salvo Flood Mitigation Project - \$234,000
8. **Elizabeth City:** Resilient Stormwater Ordinance Project - \$140,000
9. **Holly Ridge:** Multi-Use Greenway Connection Feasibility Study - \$143,000
10. **Nags Head:** Designing Living Shorelines to Restore and Protect Coastal Community Infrastructure in the Roanoke Sound - \$500,000

11. **Ocean Isle Beach:** Living Shoreline Feasibility Study and Demonstration Project - \$170,000
12. **Plymouth:** Stormwater Action Plan-Upgrade the Stormwater System - \$500,000
13. **Vandemere:** Vandemere Waterfront Park Living Shoreline - \$57,800
14. **Washington:** Living Shoreline and Levee at the Wastewater Treatment Plant (WWTP) - \$500,000
15. **Washington Park:** Living Shoreline at Public Shoreline Areas - \$237,300

Two counties and three municipalities will receive implementation funds for the completion of Phase 4:

1. **Aurora:** Wetland Restoration and Berm Improvements at Wastewater Treatment Plant (WWTP) - \$1,071,250.00
2. **Beaufort County:** Low Impact Development Demonstration Site- Beaufort County Community College - \$194,166
3. **Dare County:** Hatteras Village Bioswales - \$160,000
4. **Duck:** Teresa Court Stormwater Management Improvements - \$144,000
5. **Surf City:** Roadside Infiltration Resilience Project - \$331,535.00

These projects will be funded by SL 2023-134 Section 5.6 (f)(5) and a federal grant award we received through the National Fish and Wildlife Foundation's National Coastal Resilience Fund titled: "Pipeline: Efficiency, Effectiveness & Equity in Final Design & Permitting (NC)". The contracting process is underway.

State Floodplain Mapping Program

SL 2023-134 Section 5.6 (f)(8)

The purpose of this program is to conduct flood studies, risk assessment, and building mitigation strategies through the State Floodplain Mapping Program. Funds will be prioritized to map non-encroachment areas of the State and to provide for information sharing through the State's Flood Risk Information System.

Responsible Department and Agency

Department of Public Safety, Division of Emergency Management

Funding Allocation Update

Appropriated	\$5,000,000.00
Expended	\$220,881.65
Obligated	\$4,779,118.35
Unobligated Balance	\$00.00

Summary of Activities

Task 1: Rain-on-Grid 2-D Base Level Engineering

- Production teams are in the data collection and model setup phase.
- Production teams have provided their basin shapefiles and proposed schedule.
- Master schedule has been created.
- AGOL Dashboard has been created.

Task 2: FLOOD Rosters, Draft FIRM database and CNMS

Task 3: Calculate Flood Hazard Risk

Task 4: Evaluation of Building-Level Mitigation Strategies

Task 5: NEA Mapping

- Group 1 has been submitted and 1st round of comments (NCEM) has been provided back to contractor. Group 1 was resubmitted on 6/24. Group 2 was submitted on 7/1.

Flood Inundation Mapping and Alert Network

SL 2023-134 Section 5.6 (f)(9)

The purpose of this program is for detailed mapping and risk impact studies for 250 existing flood gauges to provide baseline information on those gauges for use in the Division's Flood Inundation Mapping and Alert Network.

Responsible Department and Agency

Department of Public Safety, Division of Emergency Management

Funding Allocation Update

Appropriated	\$3,327,500.00
Expended	\$413,144.79
Obligated	\$2,914,355.21
Unobligated Balance	\$00.00

Summary of Activities

Task 1: Development of Inundation Libraries for Riverine and Coastal Gauges

- Thirteen groups of libraries (132 sites) are submitted for QC reviews.
- Eight Groups (80 Sites) have been reviewed and comments are provided to the mapping contractors.
- Questions about the data, models and modeling approach are being addressed.
- Master schedule updated with inputs from the consultants.

Task 2: FIMAN Building Risk Databases and Transportation Layers

Task 3: Final Reports

Department of Environmental Quality

Stormwater Retrofit Pilot Cost-Share Program

SL 2023-134 Section 5.6 (f)(17)(a)

The purpose of this program is to provide a directed grant to North Carolina Coastal Federation, Inc. for the Stormwater Retrofit Pilot Cost-Share Program.

Responsible Department and Agency

Department of Environmental Quality

Funding Allocation Update

Appropriated	\$5,000,000.00
Expended	\$242,686.56
Obligated	\$439,847.07
Unobligated Balance	\$4,317,466.37

Summary of Activities

1. Overview

The Stormwater Retrofit Pilot Cost-Share Program Project, funded by the North Carolina General Assembly, is designed to enhance coastal water quality protection and reduce chronic flooding by addressing widespread non-compliance with state-issued Coastal Stormwater Permits in the 20 coastal counties. The project team, which includes the North Carolina Coastal Federation, Ward and Smith, PA, McAdams Co. Engineering, Resource Environmental Solutions (RES), and the North Carolina Department of Environmental Quality (DEQ), has completed several key actions this quarter to inform the development of a comprehensive Stormwater Retrofit Pilot Cost-Share Program.

This initiative focuses on testing methods to provide technical and legal assistance to existing or soon-to-be permit holders who are dealing with various issues that have rendered their stormwater systems non-compliant. The goal is to develop a cost-share program that supports permit holders facing financial stress, helping them address compliance issues and reset their stormwater permit requirements. The pilot will establish a cost-effective strategy to manage the thousands of compliance issues affecting this state program, particularly those problems inherited by permit holders through no fault of their own.

2. Dashboard Tool Development

To facilitate site identification and management, McAdams Co. Engineering developed an interactive web map dashboard. This GIS tool provides detailed information on permitted stormwater systems in the 20 coastal counties, including:

- **Density Classification:** High or Low
- **Permit Status:** Active or Expired
- **Compliance Status:** Compliant or Not Compliant

The dashboard also includes field notes, photos, and classifications of potential disadvantaged communities as identified by the EPA and NCDEQ. This tool has been instrumental in identifying sites for field testing retrofits and will continue to be a valuable resource for future site selection and management.

3. Property Management Firm Collaboration

The project team engaged with local property management firms to identify potential sites for retrofitting. Key engagements include:

- **Real Estate Plus, Inc. Mgt. Services**, who provides residential rental and community management services, including Affordable Housing in the Craven County region identified a dozen properties in Craven County requiring stormwater retrofits.
- **Community Association of Management Services (CAMS):** Assisted in identifying additional sites in the southeastern coastal region, which have been added to the dashboard inventory.

These collaborations are crucial in ensuring that the most impactful sites are selected for the pilot program.

4. Pilot Project Site Selection, Design, Permitting, and Contracting

Through rigorous site visits and consultations, the team has selected several pilot project sites to test various retrofit approaches:

- **Christopher Downs and Courtyard West Developments**
- **Havelock Community Missionary Baptist Church**
- **Town of Morehead City Police Department**

Resource Environmental Solutions (RES) has developed concept designs for these sites, focusing on improving and upgrading existing stormwater systems. Additionally, Ward & Smith, PA, has finalized contract agreements to formalize the retrofits. The final design, permitting, and construction of these demonstration sites are scheduled for the next two quarters.

5. Outreach and Education

The project team has actively engaged in outreach efforts to raise awareness of the program:

- A presentation was delivered at the Local Programs Annual Erosion and Sedimentation Control Workshop on April 23, 2024, at the Sturgeon City Environmental Education Center.

- Two additional professional presentations are planned for the upcoming quarter. These outreach efforts are essential for educating stakeholders and gaining support for the program.

6. Lessons Learned

Early findings from field investigations and discussions with property owners have highlighted several challenges:

- Many stormwater permit holders are facing unexpected and costly maintenance issues that they did not cause.
- Inadequate permit transfer processes between developers and property owners are exacerbating non-compliance rates, leading to significant financial and legal burdens for the current owners.
- Some corporate commercial property owners with multiple properties have expired and/or non-compliant permits, indicating systemic issues that need to be addressed at the corporate level.

These insights are being incorporated into the development of the final Stormwater Retrofit Pilot Cost-Share Program recommendations.

7. Next Steps

The next two quarters will focus on the completion of the following tasks:

- **Final Design and Permitting:** Completion of designs and securing necessary permits for pilot sites.
- **Construction:** Begin construction of the selected demonstration sites.
- **Select Additional Test Projects:** Identify at least 20 additional test retrofit projects that will be implemented to design the cost-share program.
- **Continued Outreach:** Presentations and engagements with key stakeholders.
- **Program Development:** Finalizing the recommendations and structure for the Stormwater Retrofit Pilot Cost-Share Program.

Living Shoreline Projects Funds Match

SL 2023-134 Section 5.6 (f)(17)(b)

The purpose of this program is to provide a directed grant to North Carolina Coastal Federation, Inc. to provide up to 50% match for federal, State, or private funds for living shoreline projects in coastal counties.

Responsible Department and Agency

Department of Environmental Quality

Funding Allocation Update

Appropriated	\$2,000,000.00
Expended	\$7,681.95
Obligated	\$1,708,200.00
Unobligated Balance	\$284,118.05

Summary of Activities

During this reporting period, seven living shorelines were constructed. One by Total Marine Services in Stumpy Point (Hooper - 225 ft using granite rock). Four by Native Shorelines in Newport (King – 190 ft using oyster shell bags), in Pine Knoll Shores (Shedd – 100 ft using oyster shell bags), in Beaufort (Trask – 150 ft using QuickReef), and in Marshallberg (Canon – 255 ft using QuickReef). One by Bentley Brooks Construction in Beaufort (Ramsey – 205 feet using granite rock). One built by the landowner in Hubert (Poe – 50 ft using oyster shell bags).

Two additional living shorelines are under construction in Emerald Isle (Mangum – 105 ft using QuickReef) and Hubert (Woodruff – 200 ft using QuickReef).

Twelve additional living shorelines are contracted and being permitted (Bald Head Island, Morris Landing, Gehring, Kaplan, Cullipher, Puriani, McGrew, Flannagan, Weise, Town of Duck, Wrights Creek Park, and Schiffman). Nine sites are being contracted. Eighty-four living shoreline projects are in discussion and design with the landowners.

Copies of designs, permits, landowner and contractor contracts are available upon request.

Lost Fishery Gear Recovery Program and Derelict Vessel Removal

SL 2023-134 Section 5.6 (f)(17)(c)

The purpose of this program is to provide a directed grant to North Carolina Coastal Federation, Inc. (Federation) for the Federation's Lost Fishery Gear Recovery Program and the investigation, removal, and disposal of abandoned and derelict vessels in public trust waters of the State located in Coastal Counties

Responsible Department and Agency

Department of Environmental Quality

Funding Allocation Update

Appropriated	\$500,000.00
Expended	\$98,144.06
Obligated	\$335,965.75
Unobligated Balance	\$65,890.20

Summary of Activities

Project Summary

The North Carolina Coastal Federation (Federation) was allocated \$500,000 from the N.C. General Assembly through the N.C. Division of Environmental Quality to continue its marine debris, lost fishing gear and Abandoned and Derelict Vessel (ADV) removal program and projects. The Federation is partnering with the N.C. Wildlife Resources Commission (WRC) to address and remove abandoned and derelict vessels across the North Carolina coast through WRC's legislative authority. The Federation and WRC are coordinating the ADV removal efforts with the N.C. Division of Coastal Management to ensure regulatory compliance. The Federation also received a four-year \$4.5 million grant from N.O.A.A through the Inflation Reduction Act to remove marine debris and ADVs along the coast. The appropriation funding is being used to supplement the NOAA funding, and it is being used to remove the numerous ADVs that are not eligible to be removed with the federal funding.

Work Completed During the Project Reporting Period (4/1/24-6/30/24)

(1) Project Coordination and Administration: DEQ fully executed the project contract with the Federation on 2/23/24 which allowed project activities to begin. The Federation set up its internal team and held a series of meetings with staff from WRC, DCM and DMF to coordinate and plan implementation of the marine debris project.

The Federation is working with numerous stakeholders to update the N.C. Marine Debris Action Plan (2020-2024). Since the Action Plan was launched, more than 76% of items outlined have been accomplished, with an additional 14% in progress or ongoing, thanks to the involvement of many marine debris stakeholders along the N.C. coast. The Action Plan partners are updating the

plan for 2025-2029, and they are working to prioritize marine debris strategies, assess coastal community needs, identify barriers and continue creating a coast that is free of marine debris.

The Federation is also working with the WRC, DCM, DEQ and local governments to update and strengthen current ADV authority into a more efficient and effective permanent state led ADV program.

(2) Lost Fishing Gear: A total of 60 commercial watermen and women collected 2,463 crab pots from the northeast, central and southeast coasts during the January and March crab fishery closures in 2024 as part of the Lost Fishing Gear project. The project was primarily funded by the N.C. Commercial Fishing License Resource Fund. The N.C. state appropriation funding was used to extend the project into the southeast coast, hire additional crews and cover the costs for dumpsters and disposal fees for the crab pots. The Federation coordinated with the N.C. Division of Marine Fisheries and N.C. Marine Patrol for this project.

Figure 1, Commercial watermen unloading recovered crab pots

Regional breakdown

- In Marine Patrol District 1, which covers the northeast region of the North Carolina coast from the Virginia line to Ocracoke, 20 boats made up of 40 commercial fishers picked up 1,650 crab pots.
- In Marine Patrol District 2, which spans from Ocracoke to Emerald Isle, 5 boats made up of 10 commercial fishers removed 577 crab pots.
- In Marine Patrol District 3, which spans from Cape Carteret to the South Carolina state line, 5 boats made up of 10 commercial fishers removed 236 crab pots.

Figure 2, Commercial watermen recovering lost crab pots

(3) Abandoned and Derelict Vessels (ADV)s: The Federation, WRC and local governments are collaborating to investigate, conduct owner notification, remove and dispose of abandoned and derelict vessels. The WRC and local governments with adopted ADV ordinances are using their legislated authority to authorize the removal of designated ADVs.

The appropriation funding has been critical in enabling the timely removal of ADVs once they are authorized. The NOAA ADV funding requires federal NEPA consultation for each ADV prior to removal. This environmental review process can take three to six months, during which time an ADV can sink or be further damaged, greatly increasing the removal costs and potential harm to the environment.

Field assessments have been conducted by boat by the Federation, WRC and local governments on over 40 vessels that are under priority for removal. These vessels are currently spread from Currituck county to Brunswick county. The WRC and local governments have established a notification procedure for ADVs that include placing a sticker on each ADV and sending a letter via registered mail to the last registered owner of each ADV. This initiates a time stamp for those vessels where the owner has been difficult to get in touch with. After the 30-day waiting period, if there is no change in the vessel status, it is authorized for removal. The relevant authority, WRC or local government, notifies the Federation so it can begin the removal efforts.

The Federation works with a list of specialized and recommended ADV removal and disposal third party contractors. Vessel information along with the DCM's and the Federation's Requirements for Removing Abandoned and Derelict Vessels and NOAA's Environmental Best Management Practices (BMPS) / Project Design Criteria (PDC) Checklist NOAA Funded Marine Debris Removal Projects – North Carolina are provided to the contractors. They use these guidelines to assess each vessel, provide approved removal and disposal methods, and develop cost estimates. These are provided to the Federation for review and consideration. Federation staff use their experience from coordinating 106 ADV previous removals along with the cost, methods and contractor's experience to select the best estimate package.

The selected contractor is provided a copy of the DERELICT VESSEL SALVAGE AND DISPOSAL AGREEMENT (Attachment A) which contains the BMPs and Checklist listed above along with a Vessel Removal Form (VRF). Federation staff fill in the vessel information for each VRF and submit these to the contractor. The contractor fills in the proposed removal method on the VRF for each vessel and submits the form to Federation staff who then forward the VRF to DCM and WRC for review and approval. Upon receipt of the approval for each vessel, federation staff notify the contractor they may proceed with the removal. The contractor provides a schedule for each ADV removal, and the Federation notifies the appropriate local, state and federal agencies.

Once the contractor arrives on site to each vessel, they send Federation staff a photo and/or description of the target vessel, location and any identifying registration and/or sticker information. Federation staff verify the information against the WRC Working Vessels master list and give the contractor the green light to proceed with removal. The contractor inspects the vessel and site and remove any hazardous materials.

Federation staff monitor the removal, site conditions and dismantling of each ADV by being on site or through photo documentation provided by the contractor. Any minor removal site remediation is done by using hand rakes and tools to smooth out any minor grooves or depressions and “fluff up” any flattened marsh grass. Once the vessel is towed and hauled into the laydown yard, it is dismantled with an excavator, recyclable materials (keel, rigging, metal) are separated, and the remaining portion of the vessel is placed into a dumpster. The dumpster is hauled to a nearby municipal landfill and emptied. Weight tickets are provided for each dumpster. This represents the final disposition for each vessel.

The contractor provides Federation staff with an invoice, completed VRF and photo/text documentation of each vessel removal, dismantling and disposal. Federation staff verify all the information and add in any additional information and photos and sign the VRF. The VRF’s and supplemental documentation for each vessel is submitted to WRC or the local government authority and are attached to each report.

The Federation coordinated the removal and disposal of three ADVs (described below) during the reporting period:

Date Removed	ADV #	County	Latitude	Longitude	WRC ADV #	Date Authorized	Description
6/19/24	SA24-15	Brunswick	33.88497	-78.57021	010-20240320-344	4/24/24	Cabin Cruiser, on bank of dredged canal into private marina off of Calabash River
6/18/24	SA24-16	Brunswick	33.885191	-78.570573	010-20240320-345	4/24/24	Skiff, sunk next to marsh bank of dredged canal into private marina off of Calabash River
5/21/24	SA24-13	New Hanover	34.064531	-77.889576	065-20240221-336	4/10/24	Blue sailboat on marsh bank, near Snows Cut & ICW, Seabreeze, vessel is now full of water

Figure 3. Descriptions of ADVs removed during the current reporting period.

Figure 4. Photos of the removal of ADVs SA24-15, SA24-16 and SA24-13 respectively.

(4) Marine Debris Site Inventory: Federation staff worked with community partners including local, state and federal government agencies, other NGOs, and local boat captains to conduct a site assessment to update the locations of concentrations of marine debris in public trust areas from Brunswick to Currituck counties. This survey will help to focus the use of additional federal and state funds as well as the current cleanup.

(5) Marine Debris Cleanup: The Federation has executed contracts with third party contractors, primarily commercial watermen/women to collect marine debris from public trust waters and lands along the coast. Currently this effort is primarily supported through the NOAA IRA grant. The contractors are formed into 2-4 person field crews, each with a shallow draft 21' – 24' skiff. They collect the debris by hand due to the remote location and sensitive habitats where the debris is located. The debris is hauled by skiff to the mainland where it is loaded into a dumpster for disposal in a landfill. The federation also worked with WRC to secure a general special use permit to stage dumpsters and collect debris at WRC Boat Access Areas (BAA) and ramps throughout the project area. The majority of the debris removed by hand is pressure treated wood from pilings and docks, construction material and floating dock pieces that broke up during Hurricane Florence. The remaining debris has consisted of tires, plastics, floating baskets, containers, and consumer debris.

Department of Public Safety

Flood Inundation Mapping and Alert Network

SL 2023-134 Section 5.6 (f)(18)

The purpose of this program is Budgets receipts from the SERDRF to provide a direct grant through NCEM to Hyde County to continue deployment of the emergency communications systems for Ocracoke Island.

Responsible Department and Agency

Department of Public Safety, Division of Emergency Management

Funding Allocation Update

Appropriated	\$842,592.00
Expended	\$842,592.00
Obligated	\$00.00
Unobligated Balance	\$00.00

Summary of Activities

As of June 30, 2024, The Department of Public Safety Controller's Office has expended \$842,592.00 of the appropriated \$842,592.00. These funds are being used to continue deployment of emergency communications systems for Ocracoke Island.

Directed Grants

SL 2023-134 Section 5.6 (f)(19)

The purpose of this fund is for directed grants for recipients as listed in the Committee Report described in Section 43.2 of this act.

Responsible Department and Agency

Department of Public Safety

Funding Allocation Update

Appropriated	\$131,203,342.00
Expended	\$130,803,342.00
Obligated	\$00.00
Unobligated Balance	\$400,000.00

Summary of Activities

As of June 30, 2024, The Department of Public Safety Controller's Office has expended \$130,803,342.00 of the appropriated \$131,203,342.00. The remaining unobligated balance of \$400,00.00 has not been expended as of this date due to no established contract between grant recipient and DPS.
