1. Strategic Plan Executive Summary

The North Carolina Department of Insurance is focused on consumers through fair ratemaking, injury prevention efforts, scrupulous regulation of insurance company solvency and industry practices, and protecting against insurance fraud. The Department also plays a vital safety role in protecting lives and property in North Carolina. The Office of State Fire Marshal is responsible for training fire and rescue personnel, securing property insurance for state-owned buildings, and the oversight and administration of the state's building code.

The Department of Insurance is committed to providing the highest level of consumer service to North Carolina citizens as well as its insurance-related customers. The list below summarizes the Department's strategic initiatives for the upcoming biennium.

- **Enhanced Criminal Investigations Capabilities** – Approximately 10 percent of all insurance claims involve some degree of fraud, resulting in increased premium costs to the consumer. In 2016, when the department had 20 sworn law enforcement officers, there were: 4523 cases of fraud, resulting in 233 arrests and 153 convictions. Monetary recovery was \$4,889,229.48. Due to a lack of investigators, only 12 percent of reported fraud cases were worked. In the 2017 long session of the General Assembly, we received significant funding to double our number of criminal investigators to attack insurance fraud. A Criminal Legal Division with a staff of three was added to assist local district attorneys in getting fraud cases to trial. If recent expansion proves successful, and preliminary results continue to be positive, we will pursue additional resources this biennium.
- **New Call Center Technology** - The insurance industry has experienced significant change over the past several years, especially in the area of health insurance. DOI provides North Carolinians assistance with health insurance questions, complaints and appeals. The agency is committed to the highest level of customer service and effectively monitors these outcomes to ensure that customer service levels are met. Specifically, we are in need of call center technology to: incorporate all channels of consumer communication; capture and robustly report on important data on consumer issues by reason and geographical location; provide robust staff performance analytics; provide retrospective full year call data; identify repeat callers and enter and access notes on the details of their call for purposes of enhanced customer service and potential call escalation; and identify the resolution of the call by employee and reason for the call.
- **Building Code Modernization** - Recent legislation was enacted to develop a data base of available building code inspectors who could be mobilized to assist local municipalities when and where there is high need. Debriefings from previous hurricanes have also highlighted the need for increased mobilization of code officials to better serve in recovery efforts. Forward thinking reforms are being developed and options will be presented to the General Assembly for possible legislative action.

Manage Growth in Captive Insurance Market - The North Carolina captive insurance program has experienced significant growth, which is expected to continue. NCDOI is committed to marketing and promoting Captives as part of overall economic development efforts. North Carolina is positioned as an industry leader, but we must always out work our neighbors. This past year we were able to shift internal resources around to meet our needs but expect this program to require additional resources moving forward in order to keep pace with this growing industry.

2. Mission, Vision, and Values

Agency Mission Statement

To promote a stable insurance market through unbiased regulation and to protect the lives and property of every citizen in all 100 counties while fostering superior, user-friendly service, courtesy, and respect.
