SUBJECT: Evaluation of the Savings Reserve Target Balance

In accordance with NC General Statute 143C-4-2.(f), the Office of State Budget and Management (OSBM) and the Fiscal Research Division of the General Assembly (FRD) have jointly evaluated the adequacy of the Savings Reserve based on the historical volatility of North Carolina's General Fund tax structure. OSBM and FRD have developed evaluation methodologies in consultation with national experts and in accordance with best practices indicated from the relevant economic literature.

To adequately cover two years of need for nine out of ten scenarios involving a year-over-year decline in net General Fund revenue, **OSBM and FRD recommend raising the Savings Reserve target to a balance of 11.9% of prior-year General Fund operating budget appropriations.**

The recommended Savings Reserve target is 0.2 percentage points higher than the 11.7% level in place last year. The increase is partly due to the addition of the most recent year's revenue collections data. The target may change in subsequent fiscal years due to incorporating additional years of revenue-volatility data and based on further review of and potential revisions to the current Savings Reserve target evaluation methodologies.
